Product Description

OEM ODM Available Stamping Type 40mm Width Carbon Steel Q235 Flat Strut Electric Channel Flat Plate Fitting

The fittings provide a secure mounting solution for electrical equipment, such as switches, outlets, and control panels.

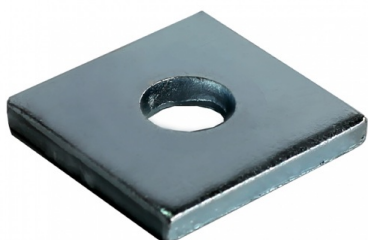

Channel fittings are compatible with a wide range of conduit sizes, accommodating different wiring requirements. They offer versatility in installation orientation, allowing for horizontal, vertical, or angled mounting options.

Product Parameters

Product Name	OEM ODM Available Stamping Type 40mm Width Carbon Steel Q235 Flat Strut Electric Channel Flat Plate Fitting
Material	Carbon Steel Q235
Thickness	6mm
OEM	Available
Fitting Width	The fitting width is normally 40mm, and they are compatible with all 41mm wide strut, so any of EzyStrut's strut products.

Product Description

1.Flat Plate Fittings make up a large part of the steel framing components of EzyStrut's strut range. They are made from merchant bar, with a 6mm material thickness, and generally supplied as hot dip galvanised products, but it is possible to get them in stainless steel too if required.

2.The fitting width is normally 40mm, and they are compatible with all 41mm wide strut, so any of EzyStrut's strut products.

3.All flat plate fittings come with pre made holes, and there is a range available to support sizes from M8-M16. Once installed, the fittings will allow insertion of other products onto strut, allow the connection of strut either straight or round a corner, and can offer lots of other useful applications in your strut installation.

4.HENGTONG manufactures a wide range of strut fittings, some examples below, for more information contact one of our Customer Service Officers.
